

Timeless Elegance, Without Frills

The renovation of this Lake Zurich apartment embraced timelessness and classic details over transient trends or pompous styles. By reimagining the room layout, the space now feels more functional and harmonious. Utilizing the entire roof truss has created an open and inviting atmosphere — perfect for the grand piano to fill the apartment with its resonant sounds. The re-designed living area below the gallery, along with the guest room and the gallery itself, provide serene spaces for retreat. A soothing palette of soft colors, paired with a modern and versatile lighting concept — including a variety of lamp styles — fosters a relaxed and cozy ambiance. Natural materials such as wood and the natural stone countertop in the kitchen add warmth and character, giving the apartment a welcoming tone that complements its timeless aesthetic.
